Yurugu removes the mask from the European facade and thereby reveals the inner workings of global white supremacy

“This book is an effort to shed light on the truth. . . . To the extent that our leaders embody aspects of who we are as a people, studying how each president has participated in our nation’s complicated and often shameful treatment of black people is as good a place as any to start.” — Margaret Kimberley from the Preface "Margaret Kimberley gives us an intellectual gem of prophetic fire about all the U.S. presidents and their deep roots in the vicious legacy of white supremacy and predatory capitalism. Such truths seem more than most Americans can bear, though we ignore her words at our own peril!" — Cornel West, author of Race Matters

PREJUDENTIAL is a concise, authoritative exploration of America’s relationship with race and black Americans through the lens of the presidents who have been elected to represent all of its people. Throughout the history of the United States, numerous presidents have left their legacies as slaveholders, bigots, and inciters of racial violence, but were the ones generally regarded as more sympathetic to the plight and interests of black Americans—such as Lincoln, FDR, and Clinton—really much better? And what of all the presidents whose relationship with black America is not even considered in the pages of most history books? Over the course of 45 chapters—one for each president—Margaret Kimberley enlightens and informs readers about the attitudes and actions of the highest elected official in the country. By casting sunlight on an aspect of American history that is largely overlooked, Prejudential aims to increase awareness in a manner that will facilitate discussion and understanding.

Afrikan life into the coming millennia is imperiled by White and Asian power. True power must nest in the ownership of the

real estate wherever Afrikan people dwell. Economic destiny determines biological destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of Afrikan Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. (Back cover).

This book presents an explosive collection of essays that call for Black consciousness and revolutionary action. The author examines Black nationalism, white minority rule, Pan-Africanism, the necessity for Black institutions and the role of the creative artist in Black struggle.

"The issue of self-hatred has very deep historical roots going way back into colonial history of the Fifteenth-century and beyond. In this text Amos Wilson details its origins as it evolved from biblical times with curse of Ham in the Old Testament up through the Middle Ages, enslavement, Jim Crow sadism and up to the present time. This experience has had long lasting impact on the creating, shaping and defining of the African American personality in particular, and the African personality worldwide. This text sets about exploring this development in its many aspects and attempts a reclamation of the African (often spelled Afrikan) mind. Herein Wilson attempts with surgical precision a remediation of this psycho-historical malady"--

Facing South to Africa is a bold synthesis of the ideas that have made Afrocentric theorists the leading voices of the African renaissance. Written from the vantage point of the philosophical and political discourse that emerged over the past twenty-five years, this is a highly readable and accessible introduction to African social and cultural criticism. Molefi Kete Asante engages in the practice of critical thinking by raising fundamental questions about how Africans view themselves and the world. Tackling the themes of culture, education, social sciences, the university, politics, African unity, and the prospects for peace in Africa, Facing South to Africa is a fresh, daring, and popularizing synthesis of the best critical thought on the issues of modern knowledge. Asante's plan is to reorient our thinking on Africa by asking questions of Africa and Africans rather than imposing preconceived, external ideas on African issues.
