UNDERSTANDING THE FIM. Functional Independent Measure. Part 2. * Scoring of Activities Important Reminders You must understand the definition of the each item in order to document accurately Do NOT merge tasks Do not rate simulations, clinical judgments NEVER copy and paste from a previous document because your FIM scores will not be recorded Each FIM item MUST be scored every 24 hours Important Reminders A number does not support a number!

UNDERSTANDING THE FIM

The UK FIM+FAM is designed for measuring disability in the brain-injured population. It has an ordinal scoring system for all 30 items from 1-7 (1=complete dependence and 7 fully independent). Scoring is conducted at 2 time points – approximately 7-10 days after admission (admission score) and within 7 days of discharge (discharge score).

FIM+FAM—The Functional Independence Measure and ...

Key Descriptions. Contains 18 items composed of: 1) 13 motor tasks. 2) 5 cognitive tasks (considered basic activities of daily living) Tasks are rated on a 7-point ordinal scale that ranges from total assistance (or complete dependence) to complete independence. Scores range from 18 (lowest) to 126 (highest) indicating level of function.
