Aqua Rite has stopped generating chlorine. A flashing LED indicates a 15-60 second time delay period. CHECK SALT When flashing, the salt level is low (below 2700 ppm) and Aqua Rite is generating at low efficiency. When illuminated steady, the salt level is too low and Aqua Rite has shut down. Page 10 4. Push the Diagnostic button to exit.

Verify salt level is 2700-3400ppm and check with independent test to ensure accuracy. If salt level is above the range, partially drain pool and/or spa and refill with fresh water to achieve a salt level of 3200ppm. (RULE of THUMB: Each inch of water drained will reduce the salt level 100ppm.) T-Cell 3: 4.15 T Cell 9: 9.50

[Aqua-Rite-5-Aqua-Rite-XL-Diagnostics-Manual](#)
The Aqua Rite Goldline Salt Generator is an automatic sanitation unit used in pools and spas. The unit works by converting salt into free chlorine, which helps to kill any bacteria or algae that forms in the pool or spa's water supply. Once the bacteria or algae has been eliminated, the chlorine then changes back into salt.

[How-to-Calibrate-an-Aqua-Rite-Goldline-Salt-Generator-1-Hunker](#)
Step 1: Adjusting Salinity (Salt) level. Before the chlorine generator can be calibrated correctly, the salinity—or salt level in the pool water—will need to be at the correct level. For these systems, it should ideally be between 3200-3600 ppm (parts per million). This can be tested using a salt test meter or salt test strips.

[How-to-Calibrate-a-Hayward-Goldline-Aqua-Rite-or-Swim-Pure](#)—
Unlike traditional chlorine treatments that require a regular routine of monitoring and replacing chlorine, electronic chlorination produces chlorine from common table salt. The key is the patented Turbo Cell®, a specially designed converter connected to the control unit.

Check Salt High Salt Inspect Cell Rotate the dial to adjust. Note: If the chlorine level does not increase within 24 hours after increasing output, test water with independent tests to determine current salt, stabilizer, phosphate, and nitrate levels. Note: Output is scaled back to 20% of desired output setting at 600 F and output stops at 500 F.
