Presents a simplified version of the ten commandments and discusses a biblical and a contemporary story showing how they should be followed in daily life.

This book presents a semiotic study of the re-elaboration of Christian narratives and values in a corpus of Italian novels published after the Second Vatican Council (1960s). It tackles the complex set of ideas expressed by Italian writers about the biblical narration of human origins and traditional religious language and ritual, the perceived clash between the immanent and transcendent nature and role of the Church, and the problematic notion of sanctity emerging from contemporary narrative.

Learn the language of la dolce vita! For anyone who wants to learn and enjoy the most expressive and romantic of languages, the third edition of 'The Complete Idiot's Guide to Learning Italian' is the first choice for a whole new generation of enthusiastic students of Italian. This updated edition includes two new quick references on verbs, grammar, and sentence structure; two new appendixes on Italian synonyms and popular idiomatic phrases; and updated business and money sections. First two editions have sold extraordinary well. Italian is the fourth most popular language in the United States.

This book, based on authoritative sources and reports, links environmental communication to different fields of competence: environment, sustainability, journalism, mass media, architecture, design, art, green and circular economy, public administration, big event management and legal language. The manual offers a new, scientifically based perspective, and adopts a theoretical-practical approach, providing readers with qualified best practices, case studies and 22 exclusive interviews with professionals. A fluent style of writing leads the readers through specific details, enriching their knowledge without being boring. As such it is an excellent preparatory and interdisciplinary academic tool intended for university students, scholars, professionals, and anyone who would like to know more on the matter.

In 1999 a collection of documents were found in the archives of the Italian Institute of Human Palaeontology belonging to Luigi Cardini, one of the founders of the Institute. These documents included site notebooks, photographs, drawings and maps relating to work carried out in Albania from 1930-39 where he was sent on a governmental mission to `reinforce Italian supremacy in Albania through archaeological research'. This monograph publishes extracts from these notebooks within a historical, political and archaeological context. The work he carried out is synthesised and a report is included on survey work carried out in 2000 and 2001 to attempt to relocate many of Cardini's cave sites described in his notebooks.

As part of Daylight Europe, the daylighting behaviour of 60 buildings was observed and measured during a three year period. Buildings of many different types, sizes and ages were included - from offices to museums, libraries, churches, houses, airports and factories; from Classical buildings to modern constructions, and from a small single room to an office of over 100,000 square meters. The results of the study of each building are presented, extensively illustrated in colour, with the unusual features and main lessons highlighted. The book also includes details of the monitoring procedures, the results of and comparisons with simulations, the outcome of post-occupancy evaluation, and a summary of the major findings. These show the extraordinary potential of daylighting techniques to improve amenity and energy performance for the benefit of the occupants and building managers. They also demonstrate how often opportunities are missed, and the frequency of problems of overheating or glare. Above all, they demonstrate the beauty, elegance and scope of daylight design.

Parliamo Italiano!, Binder Ready Version, Edition 5 continues to offer a communicative, culture based approach for beginning students of Italian. Not only does Parliamo Italiano provide students learning Italian with a strong ground in the four ACTFL skills: reading, writing, speaking, and listening, but it also emphasizes cultural fluency. The text follows a more visual approach by integrating maps, photos, regalia, and cultural notes that offer a vibrant image of Italy. The chapters are organized around functions and activities. Cultural information has been updated to make the material more relevant. In addition, discussions on functional communications give readers early success in the language and encourage them to use it in practical situations.

In recent decades, scholars have vigorously revised Jacob Burckhardt's notion that the free, untrammled, and essentially modern Western individual emerged in Renaissance Italy. Douglas Biow does not deny the strong cultural and historical constraints that placed limits on identity formation in the early modern period. Still, as he contends in this witty, reflective, and generously illustrated book, the category of the individual was important and highly complex for a variety of men in this particular time and place, for both those who belonged to the elite and those who aspired to be part of it. Biow explores the individual in light of early modern Italy's new patronage systems, educational programs, and work opportunities in the context of an increased investment in professionalization, the changing status of artisans and artists, and shifting attitudes about the ideology of work, fashion, and etiquette. He turns his attention to figures familiar (Benvenuto Cellini, Baldassare Castiglione, Niccolò Machiavelli, Jacopo Tintoretto, Giorgio Vasari) and somewhat less so (the surgeon-physician Leonardo Fioravanti, the metallurgist Vannoccio Biringuccio). One could excel as an individual, he demonstrates, by possessing an indefinable nescio quid, by acquiring, theorizing, and putting into practice a distinct body of professional knowledge, or by displaying the exclusively male adornment of impressively designed facial hair. Focusing on these and other matters, he reveals how we significantly impoverish our understanding of the past if we dismiss the notion of the individual from our narratives of the Italian and the broader European Renaissance.

The textbook, Conversational Italian for Travelers, is a fun, friendly book, not formal like most language books, and teaches everything one needs to know to travel to Italy. If you want to really understand the Italian of today, you need this book! We learn language and culture as we follow the character Caterina in dialogues that detail her travels through Italy. As she boards planes, trains, and finally takes a ride in her cousin's car, we learn how to do these things in Italian. When she meets up with her Italian family, we learn the phrases of communicating with others, including what to say if you meet someone special, how to go shopping and how to use the telephone. Finally, Caterina goes on a trip to Lago Maggiore with her Italian family, and we learn phrases needed to stay at a hotel, go sight-seeing, and of course, go to the restaurant and order wonderful Italian food! Many Italian dishes commonly ordered in Italian restaurants are listed in the last three chapters of the boo
