Tabletop CNC machines are every hobbyist's dream, providing the tools needed to cut and shape materials such as glass, wood, plastics, and aluminum.

In *CNC Milling for Makers*, author Christian Rattat explains how CNC technology works and he walks you through the entire milling process: starting with a blank piece of material, Rattat takes you step by step through to a finished product.

Rattat offers advice on selecting and purchasing the best machine for your own particular needs. He also demonstrates how to assemble a machine from a kit and explains all the steps required to mill your first project. Moving past the basics, Rattat introduces a variety of cutting tools and provides hands-on examples of how to use them to mill a wide variety of materials.
