1D Tolerance Stackup. The simplest form of tolerance analysis is the single direction, 1D Tolerance Stackup. A 1D Tolerance Stackup is created by creating a cross section of a model and adding the tolerance values for each feature in a straight line. The variation in each contributes to the overall output/outcome.

Tolerance Stack-Ups are vital to address mechanical fit and mechanical performance requirements. Mechanical fit is simply answering the question, "Do the parts that make up the assembly always go together?" Mechanical performance requirements would include the performance of mechanisms, like switches, latches, actuators, and the like.
