upper-level undergraduate and masters-level courses in international finance and management, this textbook offers readers a conceptual framework for analyzing key financial decisions of multinational firms. The authors both explain and simplify multinational financial management by illustrating how its basic principles share the same foundation as domestic corporate finance. Assuming no prior knowledge of international economics or finance, this substantially revised new edition builds upon the fundamental principles of domestic financial management to examine the unique dimensions of international finance. Readers are presented with a solid theoretical knowledgebase for examining decision problems, as well as practical analytical techniques that clarify the often-ambiguous guidelines used by international financial executives. All the traditional areas of corporate finance are explored from the perspective of a multinational corporation, focusing on elements rarely encountered in domestic finance such as multiple currencies, segmented capital markets, and political risks of nationalization or expropriation.

Discover how practical international finance can be with the unique blend of international finance theory and current applications found in **INTERNATIONAL FINANCIAL MANAGEMENT, ABRIDGED EDITION, 9E**. Using familiar companies such as Nike, author Jeff Madura clearly explains international finance in understandable terms with the support of hands-on applications. The book focuses on management decisions that maximize a firm's value. Readers examine some of the latest developments in international finance with the text's timely examples and extensive links to related Internet content. New Excel exercises and a variety of multinational corporation projects help readers refine their international finance skills. This Abridged Edition provides flexibility and an economical text choice by
