O-Ring Technical Help Material selection plays a crucial role in the performance of an o-ring in your application. Operating temperatures and compatibility with the media to be sealed are arguably the two most important parameters to be considered; however, due to the number of interacting forces that can affect seal performance it is recommended that you test your material selection in your actual application.

O-Ring Materials Selection Guide - Datwyler

General purpose EPDM O-rings are manufactured using a sulphur based curing system, these are suitable for use up to +120°C whereas peroxide cured. O-rings
