How can foreign language learning be developed in primary schools? In what ways can it be integrated into the primary classroom? Modern Languages in the Primary School tackles these questions, challenging current perceptions of primary modern languages, arguing that modern languages should be fully integrated into the primary curriculum, and looking at ways in which this can be achieved. The authors examine ways in which language-learning can be made a rich experience for all. They offer ideas on how to start language programmes in schools, or enhance those already in place. The book: - Features a 3-stage practical approach to teaching languages with different age groups in primary schools - Develops a coherent view of language learning and teaching - Refers to the KS2 Framework elements of oracy, literacy, intercultural understanding, knowledge about language and language learning strategies - Contains a chapter which offers a theoretical introduction to content and language integrated learning (CLIL) - Refers to the QTS Standards and offers a short guide to internet-based and multimedia resources This book is for Primary ITE students and experienced teachers who are taking on the Modern Language coordinator role or teaching modern languages in primary schools for the first time. This Handbook presents in-depth research conducted on a myriad of issues within the field of financial literacy. Split into six sections, it starts by presenting prevalent conceptions of financial literacy before covering financial literacy in the policy context, the state and development of financial literacy within different countries, issues of assessment and evaluation of financial literacy, approaches to teaching financial literacy, and teacher training and teacher education in financial literacy. In doing so, it provides precise definitions of the construct of financial literacy and elaborates on the state and recent developments of financial literacy around the world, to show ways of measuring and fostering financial literacy and to give hints towards necessary and successful teacher trainings. The book also embraces the diversity in the field by revealing contrasting and conflicting views that cannot be bridged, while at the same time making a contribution by re-joining existing materials in one volume which can be used in academic discourse, in research-workshops, in university lectures and in the definition of program initiatives within the wider field of financial literacy.
