Assessment in adapted
physical education is not a
simple task. Variables in
assessment instruments and
in the administration and
interpretation of tests can
sometimes generate more
questions than answers.
That's why special education
and adapted physical
activity teachers have come
to rely on Developmental and

the text adheres to the newest National Standards for K-12 Physical Education. The updates also emphasize the decisions made in the assessment process and articulate the rationale behind educational decisions. Updated reviews of specific assessment tools emphasize key points where needed and reflect new information based on the most recent versions of the tests. In addition, Developmental and Adapted Physical Activity Assessment offers the following:

- A new chapter on assessing sensory function and cognition
- New information about concussions (one of

behavior and social competencies. Developmental and Adapted Physical Activity Assessment helps teachers know what tests to use on what people, how to administer the tests, how to interpret the results, and how to plan appropriately for their students.

This innovative manual sets out advice on fundamental movement skill acquisition (FMS) and its benefits for improving physical, verbal and social skills for people with Autistic Spectrum Disorder (ASD). Improving FMS can help prevent long term health issues, and increase opportunities for

social engagement and independence. The book explores the basic skills of movement (running, catching, throwing, and balance) and how to observe, teach and assess FMS in children and adults with ASD. There are sections on how to develop and implement a programme for individuals to guide their personal development, and information on planning and tools for assessment are included. A much needed guide on how to combat impairment of FMS, the book also highlights the numerous benefits of such an approach in relation to behaviour, lifestyle, health and education.
