Data-driven insights are a key competitive advantage for any industry today, but deriving insights from raw data can still take days or weeks. Most organizations can't scale data science teams fast enough to keep up with the growing amounts of data to transform. What's the answer? Self-service data. With this practical book, data engineers, data scientists, and team managers will learn how to build a self-service data science platform that helps anyone in your organization extract insights from data. For more than 60 years, a few
organizations have followed what is
known as the "Scanlon Plan" for employee
engagement. Some early benefits were
achieved and employee satisfaction was
high in these companies, such as Donnelly
Corporation and Herman Miller Office
Furniture. Likewise, for more than 30
years now, US and European companies
have been studying and adapting the
Toyota Production System (TPS), which
has been dubbed as "Lean." Again, some

Based Integration long-term benefits have been achieved, but many have not transformed their workplace culture or achieved operational excellence. The Leadership Roadmap combines the two philosophies of both employee engagement and Lean into one concise and understandable system for leaders to follow. If leaders truly want success like Toyota, they must understand it is the combination of TPS with total employee engagement that made this company a sustaining industry leader. By following the outlined system, leaders will not only make a more successful organization for all stakeholders but will truly enhance their employee satisfaction with their daily work. This book is not just for CEOs, CFOs, and others at the executive level – it is for employees in human resources or project development, the plant manager or first line supervisor. Essentially, it is for anyone in the

Broad Integration organization who shares a strong commitment to the foundational premise of integrating the leadership of people, Lean transformation, and innovation systems. The Leadership Roadmap is a practical resource that will foster a new generation of roving leaders -- committed team members who are willing to step up and fill a void and who lead by asking questions that trigger positive change rather than simply giving orders. These new leaders will understand that while the framework for achieving success is simple, the implementation can be complex and daunting, requiring a firm and enduring dedication to renewal, and a step-by-step guide to show them the way.

Whilst terms such as Lebensraum are commonly associated with National-Socialist ideology of the 1930s and 40s, ideas of racial living space were in fact

generated in the previous decades by an international geographic community of explorers and academics. Focusing on one of the most influential figures within this group, Sven Hedin, this is the first study that systematically connects the geographic community to the intellectual history of the development of National-Socialist ideology and genocidal practices. The book demonstrates how colonial, racial and nationalistic policies were often spearheaded by explorers and geographers such as Hedin. In Germany, Britain, France, and Russia their positions as publicly recognized authors and reputable academics made them highly influential with politicians. Whilst this influence was to become most visible within Hitler's Germany, the debates were not by any means restricted to or even originated in, Germany. Germany was the home of some of the most prominent geographers, but

Based on the scientific community had a tradition of international debate and exchange with especially British, French and Russian geographic societies and institutions. Many issues that were later discussed and championed by National-Socialist ideology were aired and debated in this international setting - raising important questions about the international character and impact of National-Socialism. Tracing the intellectual history of the international geographic community and its relationship to National-Socialism, this study provides an assessment of Hedin's close involvement with the Nazi elite as a culmination of decades of political and scientific work. In so doing the book uncovers a long ignored or overlooked important connection between exploration, geographers, and genocide.
