Deep Listening: A Composer's Sound Practice offers an exciting guide to ways of listening and sounding. This book provides unique insights and perspectives for artists, students, teachers, mediators and anyone interested in how consciousness may be effected by profound attention to the sonic environment. Deep Listeningr is a practice created by composer Pauline Oliveros in order to enhance her own as well as other's listening skills. She teaches this practice worldwide in workshops, retreats and in her ground breaking Deep Listening classes at Rensselaer Polytechnic Institute and Mills College. Deep Listening practice is accessible to anyone with an interest in listening. Undergraduates with no musical training benefit from the practices and successfully engage in creative sound projects. Many report life changing effects from participating in the Deep Listening classes and retreats. Oliveros is recognized as a pioneer in electronic music and a leader in contemporary music as composer, performer, educator and author. Her works are performed internationally and her improvisational performances are documented extensively on recordings, in the literature and on the worldwide web.

Misinformation. Job displacement. Information overload. Economic inequality. Digital addiction. The breakdown of democracy, civility, and truth itself. This open access book explores the conscious and unconscious norms, values, and characteristics that drive behaviors within the high-tech capital of the world, Silicon Valley, and the sector it represents. In an era where the reach and influence of a single industry has the potential to define the future of our world, it has become apparent just how little we know about the organizations driving these changes. The Psychology of Silicon Valley offers a revealing look inside the mind of world ' s most influential industry and how the identity, culture, myths, and motivations of Big Tech are harming society. The book argues that the bad values and lack of emotional intelligence borne in the vacuum of Silicon Valley will have lasting consequences on everything from social equality to the future of work to our collective mental health. Katy Cook expertly walks us through the psychological landscape of Silicon Valley, including its leadership, ethical, and cultural problems, and artfully explains why we cannot afford to ignore the psychology and values that are behind our technology any longer.

Kiernan traces the transformation of the United States from a weak, loosely organized society of subsistence farmers, fishermen and cottage craftsmen into the most powerful colossus of industrial and technological prowess. Arguing that the primary vehicle of the country's historic transformation has been its evolving

social, scientific, technological and industrial machine, he analyzes how and why the United States became the material Goliath and how this has altered the Americans. From Ben Franklin's lightning rod to Roebling's Great East River Bridge, from the Erie Canal to Edison's light bulb and from Henry Ford's mass produced automobile to the Manhattan Project, the volume illuminates America's journey from the 18th century to today. Kiernan's startling conclusion is that what America needs now is more engineers to keep pace with the technological advances made by other nations. ISBN 0-688-00456-3 : \$16.95.
